Crop PDF Online

Trim PDF margins, change PDF page size

Sejda est disponible en français. Changer de langue?

Upload PDF files

Files stay private. Automatically deleted after 2 hours.
Free service for documents up to 200 pages or 50 MB and 3 tasks per hour.

Terms of Use and Privacy Policy

OFFLINE Rather work offline? Try Sejda Desktop

How To Crop PDF Pages Or Trim PDF Margins For Free

Below we show how to trim PDF margins online, for free. Works on all desktop platforms including Mac.

1. **Upload your files**

   Files are safely uploaded over an encrypted connection. Files stay secure. After processing, they are permanently deleted.

Rather not upload your files and work with them offline?
Try Sejda Desktop. Same features as the online service, and the files never leave your computer.

Click 'Upload' and select files from your local computer.

Dragging and dropping files to the page also works.

Dropbox or Google Drive files

You can pick PDF files from Dropbox or Google Drive too.

Expand the 'Upload' dropdown and select your files.

2. **Crop whole document (in one go)**

   Pages are rendered on top of each other, blended, so you can easily determine the crop size that matches all pages.

   Only first 30 pages are rendered by default. For larger documents you have the option to render all pages.

3. **Crop PDF pages separately**

   You can choose to crop only certain pages. Each page can be cropped with a different size.

4. **Automatically trim PDF white margins**

   We can automatically determine what is the optimal crop size so all white margins are removed.

   Click on 'Auto-crop' right above the page.

5. **Specify precise crop margins in inches**

   Exact dimensions can be specified for the cropped margins.

   Input the top, left, bottom and right margins above the PDF page.
